

SNEHA WANI

Full Stack Developer | React.js | Node.js | Technical SEO

Pune, Maharashtra | +91-7773993048 | snehawani4321@gmail.com | linkedin.com/in/snehawani | github.com/sneha9504

Professional Summary

Full Stack Developer with experience building scalable web applications and backend systems using React.js, Next.js, Node.js, and Express.js. Skilled in RESTful API development, MongoDB, authentication systems, and performance optimization. Improved SEO and Core Web Vitals across production websites by optimizing LCP, resolving crawl issues, and enhancing rendering performance using Lighthouse and Ahrefs. Experienced in developing responsive, high-performance applications with clean and maintainable code. VOIS Tech Innovation Marathon 2.0 Winner with strong problem-solving and full-stack development skills.

Technical Skills

Frontend: React.js, Next.js, HTML5, CSS3, Zustand, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, MVC Architecture

Databases: MongoDB, SQL

Languages: JavaScript (ES6+), Python, SQL

Auth & Security: JWT Authentication, Role-Based Access Control (RBAC), API Validation

SEO & Performance: Technical SEO, Core Web Vitals (LCP/CLS/FID), Canonical URLs, Meta Tags, Crawl Optimization, AI Bot Crawling, JS Rendering (SSR/CSR)

SEO Tools: Google Lighthouse, Ahrefs, Google Search Console

Tools & Platforms: Git, GitHub, Postman, Docker, GitHub Copilot, Claude AI

CS Fundamentals: Data Structures & Algorithms, DBMS, API Design, Object-Oriented Programming

Work Experience

Jr. Full Stack Developer · *TinyCheque Ventures Pvt. Ltd.*

Jan 2026 – Mar 2026

On-Site

- Contributed to SEO optimization and frontend development across **3 live production websites**, improving search rankings through technical audits using Lighthouse and Ahrefs.
- Resolved Core Web Vitals (LCP) issues — identified render-blocking resources and implemented performance fixes, improving overall Lighthouse scores across all 3 sites.
- Optimized crawlability for standard and AI bots — fixed crawl errors, managed robots.txt, and ensured content was fully indexable by all major search engines.
- Implemented full on-page SEO stack — meta tags, canonical URLs, Open Graph, structured data, heading hierarchy, and JS rendering strategy (enabled/disabled environments).

Software Development Intern — Backend / Full Stack · *TechnoHacks Solutions Pvt. Ltd.*

Jan 2025 – Feb 2025

Remote

- Built and shipped 10+ RESTful API endpoints using Node.js and Express.js with request validation, structured error handling, and standardized response formats.
- Designed and optimized MongoDB schemas with efficient query tuning, improving data retrieval reliability across concurrent operations at scale.
- Participated in Agile sprint planning and Git/GitHub code reviews, contributing to on-schedule feature delivery across a 2-month engagement.

Web Development Intern · *Web Planet, Jalgaon*

Jul 2022 – Aug 2022

- Built responsive web interfaces using HTML5, CSS3, and JavaScript, improving cross-device compatibility and reducing reported UI bugs.
- Integrated frontend components with backend APIs, contributing to faster page loads and a smoother overall user experience.

Projects

PlanVerse — 2D Floor Plan to 3D Visualization (*Final Year Project*) — *React.js, Next.js, HTML5, CSS3, Python, OpenCV, Deep Learning*

- **Frontend contributor** on a team project converting 2D floor plans into interactive 3D visualizations using depth estimation and computer vision models.
- Built the complete React.js frontend — file upload flow, interactive 3D viewer, and responsive layout — integrated with the backend CV pipeline.
- Designed an intuitive UI enabling non-technical users to explore 3D layouts with no prior software expertise, minimizing user friction end-to-end.

Billora — Smart Expense Tracking System — *Node.js, Express.js, MongoDB, React.js, Next.js*

- Designed and developed a full-stack expense management platform with secure authentication, transaction management, and automated reporting features.
- Implemented JWT-based authentication with role-based access control (RBAC), ensuring user data isolation and preventing unauthorized API access.
- Optimized MongoDB query performance, improving data consistency across concurrent transactions.

AI-Assisted Task Management System (Jira Clone) — *Node.js, Express.js, React.js, Zustand*

- Built REST APIs for task creation, assignment, and status tracking with business logic validation; integrated AI services to auto-generate task summaries.
- Implemented Zustand on the frontend for real-time task board updates without full-page reloads, improving team productivity and UI responsiveness.

Personal Portfolio Platform — *Next.js, React.js, Node.js*

- Developed an SEO-optimized portfolio using Next.js server-side rendering (SSR), achieving fast initial load times and improved search engine discoverability.
- Built with modular architecture and optimized routing for easy extensibility.

Education

B.Tech in Computer Science & Engineering (AI) · *PCET Nutan College of Engineering & Research* Sep 2023 – Present
Talegaon Dabhade, Maharashtra · **CGPA: 7.28 / 10**

Diploma in Computer Engineering · *Government Polytechnic, Jalgaon*
Jalgaon, Maharashtra · **81.66%**

Dec 2020 – Jul 2023

Achievements & Leadership

- **VOIS Tech Innovation Marathon 2.0 Winner** — Built TradeGuide, a platform empowering beginner retail investors with trading insights and data-driven decision support.
- **Lead Coordinator, SHIELD 6.0** — Planned and executed a state-level technical event with 200+ participants, managing logistics, scheduling, and a cross-functional team.
- **Smart India Hackathon (SIH 2024) Participant** — Contributed to backend system design and AI-based solution architecture at the national level.

Certifications

- Full Stack Web Development
- Front End Development
- Postman API Fundamentals Student Expert
- Data Structures and Algorithms using Java — NPTEL
- Database Management System — NPTEL
